

The Problem

There is currently no single tool that supports both automated ad creation and marketing distribution. Small businesses and marketing partners are forced to rely on multiple expensive and complex tools, often lacking the knowledge, time, and resources to manage them effectively.

Our Solution

Ads-Maker unifies ad creation, personalization, and marketing within one smart and accessible platform. Uniquely, it enables integrated collaboration between companies and agents, providing centralized control and tracking of advertising content.

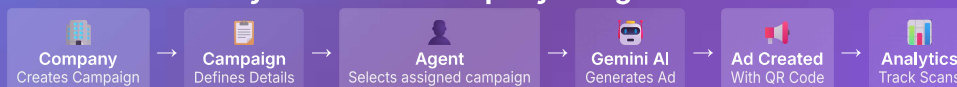

Target Audience

- Small & medium businesses
- Marketing agents & freelancers
- Companies with multiple campaigns

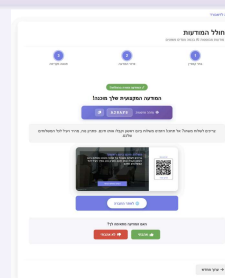

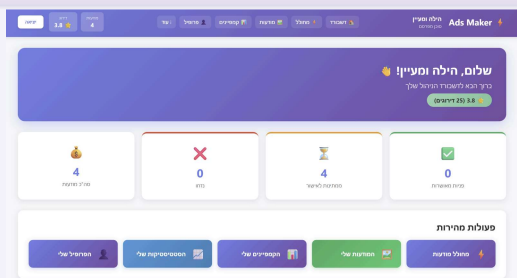

Key Value

- AI-powered content generation
- Centralized tracking & analytics
- Ad creation in multiple languages (HE/AR/EN)

System Flow: Company → Agent → AI

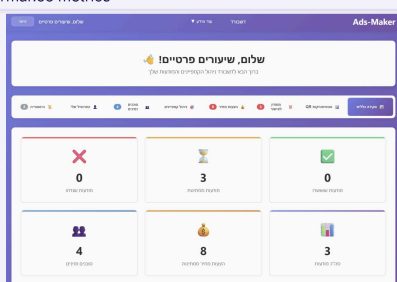

Platform Screenshots

1 Agent Dashboard

Personal dashboard with quick actions and statistics:

- View total ads created and pending approvals
- Access campaigns and statistics
- Quick navigation to ad generator
- Personal rating and performance metrics

3 Company Dashboard

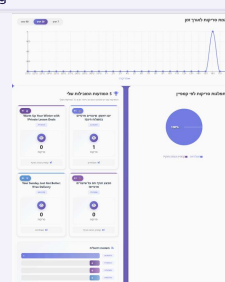

Companies manage their advertising ecosystem:

- Review pending ads from agents
- Approve or reject ad submissions
- Manage active agents and campaigns
- View price offers and statistics

2 AI Ad Generator

3-step wizard powered by Google Gemini AI:

- **Step 1:** Choose topic/campaign
- **Step 2:** Fill in ad details & preferences
- **Step 3:** AI generates professional ad with Pexels images
- Auto-generated QR code for tracking

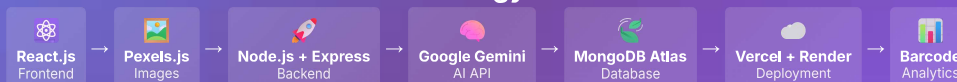

4 Analytics & Tracking

Comprehensive performance monitoring:

- QR code scan trends over time
- Campaign distribution breakdown
- Top performing ads ranking
- Real-time scan tracking

Requirements

Functional

- Ad generation within 60 seconds
- Ad creation in multiple languages (Hebrew, Arabic, English)
- Barcode-based performance tracking
- Full RTL/LTR text direction support

Non-Functional

- High availability via website and email support
- Clear, icon-based, and mobile responsive UI
- Smooth integration with Pexels & Google Gemini

Key Challenges

- Prompt engineering for optimized results from the AI
- UX/UI optimization for less tech-savvy users
- Validations, real-time production environment & multi-user support infrastructure maintenance
